"It's Not a Home Till It's Planted"

Retail Price List 1925

Boxed or Baled, f. o. b. Pomona, N. C.

Terms: 5 per cent discount for cash with order, or 30 days net. Financial references required of persons opening accounts.

Prices noted herein are as low as well-grown plants can be produced. A good plant usually cannot be grown in one or two seasons, and the term one-year or two-year-old, and heights given, such as 18-24 inches, 2-3 feet, are usually very misleading. A Spirea van Houttei, one year old may be 3-4 feet high, but it should not be compared in price or value to a well-grown plant of the same height carrying from 15 to 25 branches and frequently transplanted. Prices quoted are for extra heavy transplanted stock.

In passing some particularly attractive house you have heard, "What a beautiful place! That is a real home!" Very likely you said it yourself!

There is no question as to the fact.

But why? What is the "difference"? You've just passed several hundred "houses". Ah, there's a difference—"It's Not a Home Till It's Planted."

"You probably remember that at the time we bought the thousand rose bushes to give away we also purchased 150 climbers and bushes for planting at our factory. These bushes were set out by one of our colored men, and you will be interested to know that not a single one was lost. Every plant is growing nicely."—Oettinger Lumber Co.

In selecting plants for your lawn or premises, you are not planting for a day or year, but possibly a lifetime. Not only your own comfort and pleasure should be considered, but the passerby, your neighbor, each and all, are interested and pleased at the sight of beautiful yard embellishments—topographic aspect, outlines general design, adaptability of plants to soil, and, in brief, a comprehensive plan that embodies the practical with the æsthetic, the finished picture.

We do not recommend Coniferous Evergreens for foundation planting in the South. Use³ for screens and specimens.
